

enviroco
exceeding expectations

Enviroco are one of the leading waste management providers in the UK with increasing worldwide capabilities.

We provide innovative waste management solutions differentiated on customer service excellence delivering value with unrivalled safety and environmental focus.

Our highly skilled workforce combined with our advanced technologies and our innovative approach, delivers a unique value based package with the requirements of our customers at the heart of our service.

We operate with complete integrity, providing you with a safe and compliant service ensuring that no harm is caused to people or to the environment.

2
the extra mile

We are fully committed to providing you with customer service excellence. It's fundamental to our approach.

We do this by listening to you. Sounds simple doesn't it? But if we understand what you need we can more easily deliver a tailored service to meet your requirements.

Our commitment:-

- we are always positive and helpful
- we always go the extra mile for our customers
- we always look ahead and search for ways to provide a better, safer and more efficient service
- we believe our customers are for life
- we provide simple, direct and reliable communication lines
- we will inform, educate and protect our customers

Dealing with multiple types of waste and numerous waste contractors either at single or multi-site locations can become complicated and time consuming so we have developed a complete solution to make it simple for you.

Our integrated total waste management package allows us to handle all of your waste streams, whatever they may be, the way you want it. We can customise a package to meet your requirements, a package that will enhance the management of your waste and improve your environmental performance.

We ensure that your wastes and resources are handled and routed accordingly to best environmental principles. Through our own infrastructure, or through strong and long-standing relationships with our partners in reprocessing/recovery plants throughout the UK and Europe, we will provide you with the most sustainable solutions available to reclaim the inherent value from your waste material.

Our approach to Total Waste Management is shaped to deliver key benefits to you and this starts with our account management interface. From here we target cost reductions, environmental optimisation, safety improvements and of course we underpin this with the best available customer service, all of which leads to a longer term and mutually successful relationship.

a full range of services under one roof

a safe pair of hands

The combination of modern technology together with our experience delivers our broad range of services safely and on time, every time.

Our highly experienced and dedicated teams are trained to deliver the following services:-

- industrial cleaning (high pressure and ultra high pressure water jetting)
- platform supply vessel (PSV) tank cleaning
- non entry tank cleaning
- CCTV surveying
- drain lining
- hydro excavation
- confined space working

Safe operation is critical and we have robust systems and procedures in place to ensure that all risks are mitigated and that our people can work safely.

With a fleet of high specification vehicles and equipment we are able to respond to meet your specific requirements. Our technology, experience and operational techniques ensures that the minimum amount of waste is produced which provides you with a cost effective and positive environmental solution.

With more services, more experience and more sites in strategic locations, Enviroco is the clear choice for the UK Oil and Gas sector.

From our earliest days we have continually developed our business in response to the dynamic and challenging needs of the oil and gas industry and as a result we have become the recognised experts in this sector. We have extensive support infrastructure such as our purpose built waste management centres, direct discharge quayside locations and unique oil and gas technologies which have been combined with our highly skilled and experienced people providing a package to satisfy every one of your requirements.

Our services include:-

- Total Waste Management
- Industrial Cleaning, PSV Tank Cleaning (including our new reduced man entry system)
- Decommissioning
- NORM Decontamination via our Joint Venture NORM Solutions Limited
- Drill Cuttings treatment
- Drilling Fluids treatment
- Mercury removal, management and recycling
- Training and Advice

As the leading waste management provider to the UK oil and gas sector we are here to help you meet every challenge.

the clear choice for
oil and gas

exceeding your expectations, year after year

We have always strived to exceed your expectations. 'Exceed' is our suite of value added services.

'Exceed' describes our approach to adding value to the services that we provide you, by simply adding more. 'Exceed' covers four main areas:-

- Account Management
- Training and Awareness
- Environment
- IT and Reporting

Our Account Management team are highly experienced and capable waste managers who will provide you with a focal point, taking care of your waste management requirements and providing you with the necessary ongoing support and communication. This offering brings with it a host of valuable services tailored to your business needs such as bespoke training, project management, delivery of innovative solutions, preparation and delivery of informative presentations, contribution to your environmental review meetings and much more. Account Management underpins our commitment to you in the long term.

It is important that we share our expertise with you so that we can inform and protect you when managing your waste. We provide bespoke and Chartered Institute of Wastes management (CIWM) approved training courses to help you

meet your legislative requirements. These training packages are supported by the provision of advisory help lines to key sectors, legislative update bulletins and the preparation and supply of information posters, labels and signage.

We are passionate about protecting the environment which is why we have developed a range of services to support your environmental objectives. We can provide you with detailed, transactional cradle to grave reporting, environmental legislative updates, waste minimisation and skip audits, environmental advisory help lines and our transport optimisation system which ensures that vehicle emissions are minimised.

Enviroco aims to stay at the cutting edge of Information Technology and will use the best that the market has to offer to provide our customers with prompt, detailed and accurate management information, safety alerts, vehicles routed and tracked to minimise environmental impact and feedback on your adherence to legislative requirements via our non-conformance reporting system. We are fully committed to the introduction of new and enhanced IT systems in the coming years.
